Employment

- **Data Scientist** | Software Plattform — 2025 - present

Developing software for analyzing DeFi Liquidity Pools and Staking Investments on DEXs.

- Applying ML Clustering to categorize liquidity pools.
- Performing data preprocessing and statistical analysis to evaluate pool performance, volatility, and yield metrics.
- Reviewing latest DeFi research methods (AMM models, concentrated liquidity, optimization strategies) and applying findings to model design.

- **Data Analyst Intern** | We Are D3 (Milton, New York) — Summer 2024
  - Conducted research and statistical analysis of opposing teams *(Logistic Regression)* for Pro Basketball Team at the TBT Summer Tournament.
  - Statistical Modeling & Reporting for tracking players efficiency on the court.
  - Performed data collection, cleaning, and visualization of game footage and play-by-play data.

- **IT Support Technician** | WNF Web3 Agency (Remote, USA) — Jan - Oct 2024
  - Provided Tier 1 tech support to Web3/DeFi clients, troubleshooting issues across applications and services.
  - Managed and maintained small-scale applications and bots within Docker/Docker Compose.
  - Developed Python scripts for automated data collection and processing, storing results in containerized databases;

Education

- Robert Gordon University, Aberdeen, UK. — 2024 - 2028

  BSc (Hons) in Data Science with Business Management. *(Class Representative for Data Science)*

- Gogebic Community College, Ironwood, MI, USA. Associates Degree in Computer Programming of Applied Business. — 2023 - 2024

Technical Skills and Languages

- **Programming:** Python, SQL, R, HTML, CSS (Tailwind), Node.js
- **Databases:** Postgres, Microsoft SQL Server, SQLite, JSON/CSV (NoSQL)
- **Machine Learning:** Linear Regression, KNN, Clustering (K-Means), Decision Trees (CART, C5.0), Naïve Bayes, Association Rule Mining, Time Series Analysis
- **Data Libraries:** Pandas, NumPy, Matplotlib, Scikit-learn, SeaBorn, Caret (R)
- **Cloud & Tools:** Docker/Docker-Compose, Linux(Deployment on Linux Servers), Git/GitHub
- **Languages**: English, Russian, Ukrainian, Polish
